

I would like to thank Stanley DeWalt and Skills Canada for their very generous donation of tools for the students of Breton Education Centre.

These tools are not only giving our students more experience in the trades but also the confidence to pursue a possible future career in skilled trades.

To date, our students have completed a greenhouse here on the property of our school. This project would not have been possible without the use of Stanley DeWalt tools.

This greenhouse is a very special project for our students. The building process allowed our students to gain valuable carpentry experience. We hope to expand this project and go forward with flower beds outside the greenhouse. Other connected trades to this project will include roofer and painter. In the spring we can engage in landscaping and horticulture. In the fall harvest our goods to will be put to use in school in the areas of Baking and Cooking.

Again, the students of Breton Education Centre greatly appreciate the donation of tools from Stanley DeWalt, facilitated by Skills Canada.

Scott Timmons
Breton Education Centre Teacher
